

- **Maven Project Name:** MyAutomationTask_v001
- **Folder Structure:**
 1. **src/main/java:** contains the below packages:
 - **com.qa.Base**(contains the TestBase class)
 - **com.qa.Config**(contains the config.properties file)
 - **com.qa.Listeners**(contains the Listener class)
 - **com.qa.Pages**(contains all the page classes)
 - **com.qa.Testdata**(contains the Testdata excel file)
 - **com.qa.Util**(contains the utility class)
 2. **src/test/java:** contains the below package:
 - **com.qa.Tests**(contains **3 test cases**)
 3. **src/main/resources:** contains **testng.xml** file
 4. **reports:** It contains the **Extent report html file**
 5. **test-output:** It contains **index.html (tesNG report)**
 6. **pom.xml:** contains all the required dependencies and plugins
- **Steps to Execute:**

Step 1: Open config.properties file under com.qa.Config package and make the required changes. Provide an email ID which is not registered and the password.

Step 2: Open the Testdata excel file under com.qa.Testdata package and add the required account details under Regd page.

Step 3: Now the script is ready for execution. Open Command prompt/Terminal and execute the below commands:

```
cd <Location of the project>
mvn clean install
```

Step 4: Now refresh the Maven project and check the updated **Extent report** in **reports folder**(TestExecutionReport.html) and the **testNG report(index.html)** in **test-output folder**.
